Success Stories

Discover how we empower businesses with tailored tech solutions.

Revolutionizing Investment Platforms with Advanced AI Integration

About the Client

Frequency Invest is a cutting-edge **fintech company** specializing in AI-driven investment solutions. Known for their commitment to innovation and security, they aim to provide seamless investment experiences for their growing user base.

The Solution

Goosebelt collaborated with Frequency Invest to:

- Deploy a **Microservices Architecture on Azure** for enhanced scalability and reduced downtimes.
- Implement **Advanced Data Encryption** to safeguard sensitive data.
- Ensure compliance with industry regulations through targeted infrastructure improvements.

The Challenge

As their platform scaled, **Frequency Invest faced frequent downtimes and rising security concerns**, impacting their ability to deliver consistent services. They needed a robust infrastructure to ensure reliability, enhance data protection, and comply with industry regulations.

The Outcome

- **40% reduction in system downtimes**, resulting in uninterrupted services for users.
- **Strengthened data security**, boosting customer trust and satisfaction.
- **A more reliable and scalable investment platform**, positioning Frequency Invest for long-term growth.
